

 www.rustins.co.uk	PRODUCT DATA SHEET
Product	Pure Turpentine
Type	Pure Gum Turpentine.
Intended Use	May be used to dissolve Beeswax to make a wax polish. Traditional thinner for alkyds, oils, varnishes, enamels and Artists colours. Pure Gum Turpentine improves brushing qualities and cleans brushes, rollers, and spray equipment. It may also be used to remove dirt, wax, and grease from surfaces before painting.
Properties	Solvent. Low flash point. Evaporates quickly.
Compatibility	Can be used as a solvent with most oil based products.
Shelf-life/Storage	The shelf life of the product in an airtight container is indefinite. It is preferable to store the product in a cool place. It is important to replace the lid and ensure an airtight seal.
Hazards	Flammable. Harmful by inhalation, in contact with skin and if swallowed. May cause lung damage if swallowed. Keep out of reach of children. Keep away from sources of ignition-no smoking. Do not breathe vapour. Avoid contact with skin and eyes. A full Safety Data Sheet is available upon request.
